

DELIVERY & RECEIVING MODULE

The Profitect Delivery and Receiving (D&R) Module enables retailers to minimize losses by focusing on the store's back door interface to the DCs, DSD suppliers and other stores. This module points out delivery and receiving exceptions and shrink due to missing goods, damaged items, mishandling of claims or returns, supplier or receiver error, fraud, and non-compliance. Data and alerts are correlated to any relevant entity specific to receivers, transporters, or suppliers highlighting where corrective actions should be taken and where controls should be tightened.

Benefits

- Maximize profit protection opportunities related to goods receiving and return processing at the store level
- Minimize credit losses by improving adherence to return handling and claim submission procedures
- Shorten reaction time to order and receiving discrepancies
- Reduce logistics and reverse logistics losses and costs
- Optimize the allocation of loss prevention personnel and technology
- Improve service levels of suppliers, carriers, and receiving operations
- Get a quick return on your investment with minimal deployment effort and training requirements

Prevent Profits From Fleeing Through Your Store's Back Door

Tracking Received Goods

Analyzing mismatches between products ordered and goods received, Profitect enables retailers to identify excessive discrepancies and trace them back to specific suppliers, distribution centers, or receiving personnel with the appropriate corrective action.

Monitoring Returns and Claims

Profitect allows retailers to pinpoint deficiencies and irregularities in the processing of returns and claims, ensuring due credit is requested when a product is missing from a shipment, damaged, recalled, or returned to the supplier.

Best Practice Solutions

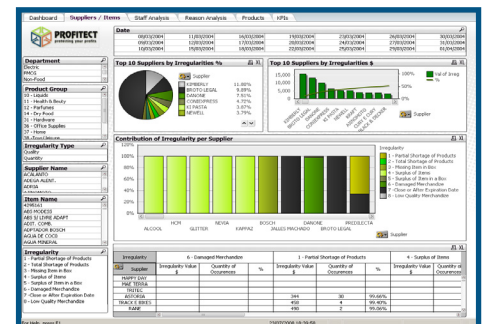

Profitect helps retailers not only to find problems but also correct them. With a knowledgebase of solutions compiled over 15 years of retail experience, Profitect helps managers at all levels uncover root causes and implement a plan to correct them.

Delivery and Receiving KPI and Scorecard

The Profitect D&R Module allows users at all levels to establish and track profit protection metrics and key performance indicators (KPIs), helping the organization to continuously improve profit-enhancing practices and results. Some of the D&R KPIs include: item or product returns; supplier irregularities; claims; product waste; and transfers.

Easy to Deploy: Minimizing Time to Value

Profitect is a modular solution that can be quickly deployed and easily integrated with data extracted from your core systems. With an intuitive user interface, Profitect requires minimal time and resources for implementation, training, and maintenance.

The Profitect Suite: Paving the Path to an Integrated Profit Protection Process

The Profitect Delivery & Receiving Module is part of a comprehensive suite of software solutions that target shrink, waste, and margin loss for increased retailer's profit through loss prevention, fraud detection, and compliance assurance. The solution shifts your loss prevention process into a profit protection process, turning knowledge into actions by employing both predictive analytics and pattern recognition algorithms to; Pinpoint risk areas and entities; Generate actionable alerts; and Prescribe corrective actions. For more than 15 years, Profitect's expertise has successfully increased profits for retailers worldwide, and delivered high and immediate ROI supported by modular, quick, non-disruptive deployment of modern, scalable technology, and by time-tested best practices.

Profitect has been **consistently delivering a 5-8% profit increase in less than 12 months** at major Supermarket, Convenience Store, Department Store, Specialty and Fashion Chains across Europe, Asia, South Africa and North America.
