

LOGISTICS & WAREHOUSE MODULE

The Profitect Logistics and Warehouse (L&W) Module enables retailers to maximize the effectiveness of profit protection practices throughout the warehouse, shipping operations, and reverse logistics. Enabling retailers to put in tighter controls, the L&W Module helps detect and prevent losses during the handling of merchandise throughout the product life cycle, covering the warehouse interfaces with DCs, suppliers, logistics carriers and stores.

Protect Profits In Your Shipping And Warehousing Operations

Monitoring Suppliers, Carriers & Warehouse Operations

Analyzing data at critical junctures where goods exchange hands from third party to internal handlers, Profitect enables retailers to quickly spot irregularities and exceptions related to suppliers, shippers, warehouse operations, and at the points in which they intersect.

Action Plan Recommendations

Profitect offers a knowledgebase of best practice solutions compiled over 15 years of retail logistics experience; rather than just surfacing problems, Profitect helps logistics managers and their resources identify root causes of loss and fraud and put in place a detailed action plan to improve risk areas.

The Profitect L&W module allows retailers to identify high risk products in their value chain so managers and analysts can immediately zero in on the problems and actions that will result in the greatest return on their efforts.

Logistics and Warehouse KPI and Scorecard

The Profitect Logistics and Warehouse module allows users at all levels to establish and track profit protection metrics and key performance indicators (KPIs), helping the logistics organization to continuously improve profit recovery opportunities. Some of the L&W KPIs include: return to suppliers; transfers between stores; waste in distribution centers; returns to supplier; and product waste.

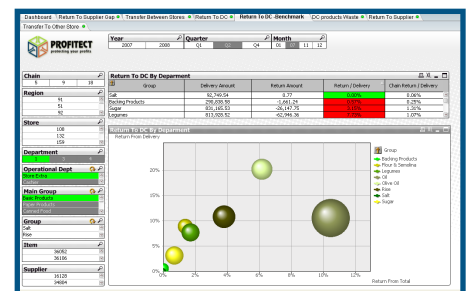

Easy to Deploy: Minimizing Time to Value

Profitect is a modular solution that can be quickly deployed and easily integrated with data extracted from your core systems.

With an intuitive user interface, Profitect requires minimal time and resources for implementation, training, and maintenance.

Benefits

- Maximize profit protection opportunities as goods move from the supplier to the store through shipping and distribution centers
- Accelerate reaction time to fraudulent actions and other profit risks related to shipping and warehousing
- Reduce logistics and reverse logistics losses and costs
- Optimize the allocation of logistic related personnel and technology
- Increase awareness and compliance with profit protection policies at the warehouse and distribution centers
- Improve service levels of suppliers, carriers, and internal logistic operations

The Profitect Suite: Paving the Path to an Integrated Profit Protection Process

The Profitect Logistics and Warehouse Module is part of a comprehensive suite of software solutions that target shrink, waste, and margin loss for increased retailer's profit through loss prevention, fraud detection, and compliance assurance. The solution shifts your loss prevention process into a profit protection process, turning knowledge into actions by employing both predictive analytics and pattern recognition algorithms to; Pinpoint risk areas and entities; Generate actionable alerts; and Prescribe corrective actions. For more than 15 years, Profitect's expertise has successfully increased profits for retailers worldwide, and delivered high and immediate ROI supported by modular, quick, non-disruptive deployment of modern, scalable technology, and by time-tested best practices.

Profitect has been **consistently delivering a 5-8% profit increase in less than 12 months** at major Supermarket, Convenience Store, Department Store, Specialty and Fashion Chains across Europe, Asia, South Africa and North America.
